SKADELIK**

## WARNINGS

- Only to be used by trained personnel.
- Handle with care. Disregard of warnings can have serious consequences.
- Do not use in grain mills, silos, stores or warehouses containing unsealed edible commodities.
- Flammable - do not spray near open flame.
- Skin and eye irritant.
- Do not expose container to direct sunlight or temperatures above 50 °C.
- Do not puncture or incinerate can.
- Keep out of the reach of children, uninformed persons and animals.
- Poisonous by inhalation or contact with the skin.
- Store away from food or foodstuffs.
- Toxic to fish, wildlife and birds.
- In case of poisoning call a doctor immediately and make this label available to him or her.

## PRECAUTIONS

- Prevent contamination of food, utensils and drinking water.
- Remove pets and cover aquaria prior to application.
- May stain plastic materials or highly polished surfaces.
- Do not eat, drink or smoke during application.
- If it is necessary to enter premises under treatment during application or within 6 hours after application wear a respirator, goggles and protective clothing.
- Do not inhale spray mist. Avoid contact with the skin (by wearing gloves) and wash off any splashes with soap and plenty of water.
- Wash all food handling equipment after treatment.
- **NOTE TO PHYSICIAN:** This is an organophosphate containing product. In case of poisoning keep patient fully atropinised.

## DIRECTIONS FOR USE- USE ONLY AS DIRECTED

Close doors and windows and switch off ventilation. Place the aerosol(s) in a raised position in the space to be treated. Where more than one aerosol is required distribute them evenly throughout the area. To activate press trigger until it is locked into the spray position. Leave room at once. The entire contents will release at once. Always activate the aerosol furthest from the door first. The room should be left closed overnight where possible or for at least 6 hours before using again. Total spray duration per can is about 5 minutes, which is sufficient to treat from 150m<sup>2</sup> to 600m<sup>2</sup> of room space, depending on the type of pests to be controlled (See Table). Follow the precautions regarding re-entry of freshly treated premises.

PESTS	
<b>Flying insects</b> (e.g. moths, flies, mosquitoes)	200 m <sup>3</sup>
<b>Stored product pests</b> (e.g. grain and flour beetles and weevils and their larvae)	100 m <sup>3</sup>
<b>Crawling insects</b> (e.g. cockroaches, fishmoths, mites, lice, fleas, crickets, bedbugs, carpet beetles)	50 m <sup>3</sup>
